I was adequately prepared in advance of the meeting.					
I understand the safety and risk concerns identified in my home.					
I feel that I played a role in assessing the safety concerns in my home/family and had a chance to come up with ideas for how to eliminate problems.					
The risk and safety assessments fairly assessed possible risk of harm to members of my family.					
The meeting was held in a way that was easy to understand.					
I was able to express my thoughts and ideas in this meeting, and that I was listened to.					
I was respected by my caseworker/the team at the meeting.					
The needs of my family were met and my case plan was appropriate.					
Attempts were made by my caseworker/the team to understand my culture and values, and were incorporated into my case plan.					
I would voluntarily attend a case planning meeting or TDM that involves me and my family.					
Parents should always be included in case planning meetings					
The case coordination between CalWORKs, FCS and the rest of the team was beneficial.
